

SARVESH GULGULIA

Silchar, Assam, India

+91 9435079797 | sarveshgulgulia@gmail.com | GitHub | LinkedIn

EDUCATION

JK Lakshmipat University

Bachelor of Technology in Computer Science Engineering

Expected 2027

Jaipur, India

- **Relevant Coursework:** Data Structures & Algorithms, Database Management Systems, Operating Systems, Computer Networks, Cryptography & Network Security

EXPERIENCE

Unified Mentor

Web Development Intern

May 2025 – Jul 2025

Remote

- Developed projects including a Tic-Tac-Toe game, portfolio website, to-do list app, and gym management system.
- Worked with front-end and back-end development concepts using modern web technologies.
- Improved practical implementation, debugging, and problem-solving skills in a remote internship environment.

TECHNICAL SKILLS

Languages: Python, C++, C, JavaScript, SQL, HTML, CSS

Frameworks/Technologies: React, Express.js, Node.js, MongoDB, PostgreSQL, Django, Firebase, Tailwind CSS, REST APIs

Tools & Platforms: Git, GitHub, MySQL, OpenCV, Linux, Hadoop

Domains: Cybersecurity, Machine Learning, Full Stack Development, Web Development, Cryptography, Distributed Systems

PROJECTS

AI-Powered Steganography with AES Encryption | GitHub

- Built a secure steganography system using AES encryption and LSB image embedding techniques.
- Implemented encryption, embedding, extraction, and decryption workflows for PNG images.
- Integrated Python-based cryptographic and image-processing libraries for secure hidden communication.

Movie Success Prediction using Ensemble Learning | GitHub

- Developed machine learning models using Logistic Regression, KNN, and Decision Trees with ensemble voting.
- Performed preprocessing, feature engineering, and genre-based prediction analysis on movie datasets.
- Applied classification metrics and comparative model evaluation for performance optimization.

Startup Management System | GitHub

- Developed a startup management platform using Django and MySQL for handling startup profiles and employee records.
- Implemented job posting, authentication, and database management functionalities.
- Focused on backend workflows, relational database design, and full-stack web development concepts.

Distributed Maximum Clique Finder Using Hadoop | GitHub

- Implemented a distributed graph-processing system using Hadoop for maximum clique detection.
- Focused on scalability, distributed computing, optimization, and parallel computation techniques.
- Worked with large-scale graph-processing workflows in big-data environments.

Penetration Testing Tool | GitHub

- Developed a cybersecurity-focused penetration testing and vulnerability assessment tool.
- Explored ethical hacking concepts, security testing automation, and system analysis workflows.
- Focused on vulnerability identification, security auditing, and practical cybersecurity techniques.

Real-time Server Network Monitoring System | GitHub

- Built a real-time monitoring system for tracking server and network performance metrics.
- Implemented monitoring, alert handling, backend system management, and performance visualization concepts.
- Focused on networking workflows, automation, and infrastructure monitoring techniques.

Face-Controlled Spotify Volume Controller | GitHub

- Created a computer vision application for controlling Spotify volume using facial movements and gesture detection.
- Integrated OpenCV-based face tracking and Spotify API automation features for media control.
- Implemented real-time interaction handling and automation concepts using Python.

CERTIFICATIONS

- IBM Cognitive Class - Spark Fundamentals I
- Coursera Project Certificate
- Cisco - Introduction to Cybersecurity
- Red Hat System Administration I (RH124)

INTERESTS

- Strong interest in Cybersecurity, Cryptography, Distributed Systems, and AI-integrated applications.
- Passionate about solving real-world problems through software engineering and modern technologies.
